3. Patentees request that the Office issue a Certificate of Correction to add the nine documents listed in Paragraph 2, above, to the face of the issued patent. These documents were cited during prosecution by Patentees in their Information Disclosure Statement (“IDS”) filed on July 7, 2008. The IDS form was initialed by the Examiner on May 2, 2009.

The Examiner initialed the documents listed under “Foreign Patent Documents” and “Non-Patent Literature Documents”, but did not initial the documents listed under “U.S. Patent Documents”. The Examiner deliberately drew a line through the first document in the “Non-Patent Literature Documents” section to indicate this document was not considered, but did not draw any lines through the documents in the “U.S. Patent Documents” section. Accordingly, the Examiner made an inadvertent error by not initialing the documents in this section. This situation was not detected by the Office of Patent Publications during post-allowance processing, and the patent issued without the nine identified U.S. patent documents being listed on the face of the patent.

Consequently, as the Examiner appears to have considered the nine identified documents and did not strike them from the IDS form, Patentees request that the Office issue a Certificate of Correction adding these documents to the face of the issued patent.

4. Attached is a copy of Form PTO/SB/44 (also Form PTO-1050).

5. Please send the Certificate to the undersigned Agent.
